

Year 6 Science Fair 2021

Thursday, July 15, 2021

Dear Parents / Caregivers,

Students in Year 6 have been asked to choose a question of interest and were required to answer that question using the scientific method. Over the last 6 weeks, students have been busy planning, researching, hypothesizing, testing and reporting. The final part of this process is communicating. Students will be communicating their findings and presenting their work at our annual Science Fair.

The Science Fair will be held on Tuesday the July 27 in our school hall. Students will set up their projects in the hall during the morning session. They will then showcase their projects to all other classes in the school during the middle session, between lunch and recess. Once the projects have been marked, winning students will be presented with prizes and all who completed their projects will be given a certificate to recognise their hard work and dedication.

Unfortunately, parents and family members will not be able to attend the event due to current COVID restrictions. We will take photos at the Science Fair and of students with their projects for parents and caregivers to view.

I'd like to thank parents/caregivers for supporting your child through this process at home and Mrs Kirk and Ms Patterson for assisting students at school.

Yours Sincerely,

Ben Kirk – Science Fair Coordinator
